

ACCOUNTANCY | PLANNING | ADVICE

FarmPro

Expert advice and real-time data,
putting you in control.

Supported by  **Bank of Ireland**

See clearly today so
you can better plan
for tomorrow.

FarmPro is *ifac's* new premium service for future-focused farmers — combining expert financial reporting, planning and forecasting services with our new leading, dedicated farm software to help you better run and manage your farm business.

The oversight, insight, & foresight you need to make confident, informed decisions for your farm.

Our new, easy to use online platform clearly & simply tracks farm data such as livestock, dairy and crop production — without the need for any additional data inputting on your part.

Your entire farming team can access your farm's financial information remotely and in real-time, enabling confident and informed decision-making, more accurate forecasting, and genuinely sustainable planning.

In tandem with the new software, our team of expert advisors will meet with you to plan and forecast based on the robust data that has been generated.

As your circumstances change, we react and revise plans with you, to suit your particular needs, year round.

Expert advice

Allowing you spend more time planning for your future, less time looking back. Grow with confidence, and fulfil your ambitions.

Automated updating

Automated data feeds mean less time spent inputting and more time to manage your farm.

Real-time accounts

Collaborate with your advisors and stakeholders using real-time financial information — with all your data clearly and easily available in one place.

Improved efficiency

Forecasting and budgeting is easier, faster, and more efficient, meaning your farming team can focus on what's important.

Simple, powerful software

World leading farm accounting and financial management software platform from Figured — our New Zealand based farm-management software partner.

Access to real-time data gives you a clear and live view of your current farm finances. Our FarmPro advisors will help you to identify risks and opportunities produce accurate forecasts, and plan for your future.

Know where you stand and where you're going.

Track farm production

Track livestock, crop and milk production sales against operational expenses.

Consolidated Reporting

Group multi-entity organisations for streamlined reporting.

Real-time data

The whole farm team can collaborate online with one set of real-time data.

Rolling Forecast

Forecast cashflow, profit and loss, and balance sheet at any time.

Support and training

Receive training and on-going guidance from our specialists.

Multi-farm feature

If you have more than one farm holding, you can see how each individual holding is performing.

Your farm finances in real-time, for the first time.

Growing forward together

Founded in 1975, *ifac* is Ireland's farming, food and agribusiness specialist professional service firm. We are an award winning employer and one of Ireland's Top Ten Accountancy firms operating from more than 30 offices nationwide.

We bring the full depth and breadth of our financial expertise and sectoral experience to play an integral role in your business. We pro-actively work with you to advise on sound financial practices, provide foresight to anticipate issues, and identify opportunities to help you grow.

Figured is a leading farm financial management software that is helping farming teams across New Zealand, Australia, the United Kingdom, the United States and now Ireland to better manage the profitability of their operations.

Bank of Ireland is delighted to collaborate with Ifac on FarmPro to support farmers' financial wellbeing and simplify their financial management experience. To this end, we will cover the cost of the software licence for the FarmPro service, for our shared customers. Bank of Ireland is regulated by the Central Bank of Ireland.

A national team of dedicated experts.

With over 30 offices across Ireland, our clients have access to a national network of expertise across a broad range of sectors - from agribusiness and farming to wind energy and food production. Our roots within each of our communities means we have deep local understanding and knowledge.
